NBP007 Process Photometer

Typical Applications:

- Concentration measurement
- Interface detection
- Cell & biomass density
- Crystallization control
- Control & optimize CIP cycles
- Product differentiation & identification

The Kemtrak NBP007 is a high resolution backscatter photometer that revolutionizes the measurement of high concentration suspended solids.

Traditional turbidity based optical measurement instruments lack resolution and stop working at approximately 1% suspended solids due to the extremely high optical density. This limitation is overcome with the NBP007 and for the first time the operator can monitor and have complete control over their process.

By knowing exactly what is happening at all times, process changes can be quickly implemented that result in substantial cost

savings.

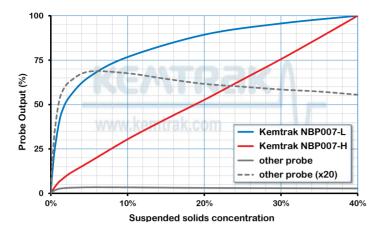

- 5 NTU to 100% suspended solids
- Real time in-line measurement
- Zero maintenance
- For use with DN25/1" TriClamp probe or Ø 12 mm PG 13.5 immersion probe

Standard features include 16 linearization tables for multiple product switching, remote zeroing, automatic cleaning cycle and signal filtering. The robust industrial fiber optic probe with scratch resistant sapphire optics, no electronics and no

moving parts are well suited for both ordinary and hazardous area installation and can withstand high temperature process streams or sterilization cycles. A built-in graphical internet based interface allows remote operation, calibration, validation and data trending using a standard web browser.

All Kemtrak products are designed to meet the most demanding application specifications and are made from the highest quality materials to ensure exceptionally long life and the highest reliability possible.

A unique benefit of the Kemtrak backscatter probe is that it does not go blind at high sample concentration

Other probes will stop working at 4000 NTU/FNU (< 1 wt% solids) after which the signal will decrease resulting in an erroneous and misleading output. The output of a Kemtrak backscatter probe will continue to increase with sample concentration ensuring a reliable measurement.

Measurement Principle

Proprietary NIR backscatter photometric technique for fiber optic backscatter probes

Measurement Range

LOW 0.0005% (ca. 5NTU) to 10% total suspended solids HIGH 0.0005% (ca. 5NTU) to 100% total suspended solids Measurement range is factory configured

Typically < ± 1% of respective measuring range

Typically < +2% at the calibration points

In-line Hygienic Fiber Optic Measurement Probe

Process connection: Tri-Clamp® (ISO 2852 & DIN 32676) or Ø12mm PG 13.5 (DIN 19263:2007-05) DN50 (2") and above & tanks/reactors Materials: Stainless steel EN 1.4435 (316L)

Hastelloy C-22 Window Sapphire Ra < 0.38 µm Surface Finish:

Ambient & process temperatures up to 275 °C (527 °F) 10mbar to 100bar (0,14 – 1450 psi) Temperature:

Cable length:

5 m standard (16.4 foot) Lengths up to 50 m (164 foot)

Light Source

High performance near infra-red (NIR) light emitting diode Typical NIR lamp lifetime: > 100 000 hrs

Photometer Housing Stainless steel EN 1.4301 (X5CrNi18-10), AISI 304 (V2A) Captive lid screws & external mounting brackets stainless steel 244 x 215 x 105 mm (L x W x D) IP 65 / EN 60529

16 x 4 alphanumeric white on blue dot matrix LCD display

LED background illuminated Measurement updates every second

LED 1 (green): LED 2 (red): LED 3 & 4 (orange): System fault Alarm 1 & Alarm 2 LED 5 (blue) Clean / Hold

Operation

4 push buttons

Remote HTML/Java interface (TCP/IP connection via Ethernet port)

Fully automatic photometer gain switching Automatically, locally or remotely activated zero 16 linearization tables for concentration & mA output Auto gain: Calibration: Damping: From 0 to 9999s with noise (air bubble / particle) filter Nonvolatile - all data retained upon power failure

Security Alphanumeric password protection

Data Logger

> 17000 data points (timestamp, average, max. & min.), ring buffer Configurable log time interval 1 s to 24 hr

> 16000 events, ring buffer
Timestamp, alarms, zeroing, cleaning, product change, calibration & system events (power, system warning & error messages)

Automatic Cleaning Control

Automatic cleaning sequence, triggering dedicated relay output Manual trigger or external trigger via digital input

Configurable automatic cleaning interval, 15 min to 2 months Configurable cleaning duration from 0 to 9999s

Auto-zero after clean option Hold value after clean (to equilibrate) 0 to 9999s

Remote Input

5 x Digital input (potential free contact) for:
• Input 1-3: Product/range selection

Zero, instant zero, clean or clean & Zero

Hold (freeze output), data log control or light source control input 5:

mA Output

1 x selectable 0 - 20 mA / 4 - 20 mA (NAMUR, max 21.6 mA)

Optional second mA output

Galvanically isolated, tested during final inspection to 500 VDC

Accuracy < 0.1% 0.025% Resolution Load: 0 - 600 Ohm

Relay Outputs

1 x 1 A 240 VAC Failsafe output (active when system is ok) 1 x 1 A 240 VAC Palisate output (active when system is o 2 x 1 A 240 VAC User configurable (alarm, PID) 1 x 1 A 240 VAC Automatic cleaning control Fuses: 4 x 1 A (type: MXT), max 100 A breaking capacity LED status indicators flash when relays are active

Dedicated relay output, 1A 240 VAC

mA output value used to signal a system fault (NAMUR < 3.6 mA or > 21.0 mA)

Network interface (remote communications):

TCP/IP, 10Base-T and 100Base-TX Link R 145

Connector:

1) HTML/Java interface using native protocol over TCP/IP Software: Web browser with Java version 6 or later

2) MODBUS server (slave) over TCP/IP (V1.1b3 compliant) Functions: (0x03, 0x04, 0x2B/0x0E - conformity 0x01)

Operating Conditions

Ambient temperature: 0°C to +50°C (32°F to 122°F) -20°C to +70°C (-4°F to 158°F) Transport:

Power Supply 100-240 VAC, 50-60 Hz & 22 - 30 VAC/VDC

Mains fuse: 1A (type MST), Max breaking capacity 35A

Power Consumption

25 VA (max.)

Distributor

Kemtrak is a leading manufacturer of fiber optic measuring and automation products for the process engineering industry. Kemtrak provides tailor made solutions to meet the needs of a wide range of industries including chemical, petrochemical & offshore, biotech, pharmaceutical, food & beverage, pulp and paper and water & environment. Kemtrak has trained representatives and support personnel globally and is certified according to ISO 9001:2015.
